AFCO 5356

GENERAL DESCRIPTION

AFCO 5256 is a heavy-duty caustic CIP cleaner designed specifically for the removal of soils found in dairies, cheese plants, and other food processing plants. It is a highly alkaline product with unique cleaning agents for use in C.I.P. systems. AFCO 5356 contains a blend of water conditioning agents which prevent scale formation. It is also free rinsing which eliminates water spotting and film formation on equipment surfaces.

PHYSICAL PROPERTIES

Appearance	:	Clear, colorless liquid
Odor	:	Slight
pH (1% solution)	:	>13
Specific Gravity	:	1.30
Foam Level	:	None

DIRECTIONS FOR USE

C.I.P. Systems:

Use ½ to 5 ounce(s) of AFCO 5356 per gallon (4 to 38mL/L) of water at a minimum temperature of 70°F/21°C up to a maximum temperature of 190°F/88°C. (Strength variations due to soils encountered in varied applications). Follow with a rinse of potable water.

Consult your *AFCO/Zep* technical representative for specific use applications.

SAFETY

Safe for use on stainless steel at the recommended use concentration. Not for use on aluminum, galvanized steel, tin, zinc, or other soft metals.

DANGER

Corrosive! Contact with undiluted product causes severe skin burns and serious eye damage. Consult the product's Safety Data Sheet (SDS) for complete safety information.
