## AFCO 5356

### GENERAL DESCRIPTION

AFCO 5356 is a heavy-duty caustic CIP cleaner designed specifically for the removal of soils found in dairies, cheese plants, and other food processing plants. It is a highly alkaline product with unique cleaning agents for use in C.I.P. systems. AFCO 5356 contains a blend of water conditioning agents which prevent scale formation. It is also free rinsing which eliminates water spotting and film formation on equipment surfaces.

### PHYSICAL PROPERTIES

Appearance	:	Clear, colorless liquid
Odor	:	Slight
pH (1% solution)	:	>13
Specific Gravity	:	1.30
Foam Level	:	None

### DIRECTIONS FOR USE

#### C.I.P. Systems:

Use ½ to 5 ounce(s) of AFCO 5356 per gallon (4 to 38mL/L) of water at a minimum temperature of 70°F/21°C up to a maximum temperature of 190°F/88°C. (Strength variations due to soils encountered in varied applications). Follow with a rinse of potable water.

Consult your *AFCO/Zep* technical representative for specific use applications.

### SAFETY

Safe for use on stainless steel at the recommended use concentration. Not for use on aluminum, galvanized steel, tin, zinc, or other soft metals.

### DANGER

Corrosive! Contact with undiluted product causes severe skin burns and serious eye damage. Consult the product's Safety Data Sheet (SDS) for complete safety information.
