CCT-400 (AFCO 6051)

GENERAL DESCRIPTION

CCT-400 (AFCO 6051) is a chlorinated alkaline gel (thin film) cleaner. Because of its unique formulation, it is a clear, low viscosity liquid in its concentrated (undiluted) form, but when mixed with water at the recommended use concentration it becomes a viscous gel solution. This gel solution forms a thin film of cleaner on the surface of the equipment resulting in prolonged contact time on the soiled surface.

AFCO 6051 provides a long dwell time on all surfaces including vertical and complex shapes, providing a long contact time combined with easy rinsing and cost-effective results. It is especially effective on irregular or rough surfaces where standard foams struggle to achieve coverage. Using AFCO 6051 in place of conventional foam cleaners can result in more thorough and effective cleaning with a reduction in cleaning time, and labor costs.

AFCO 6051 is primarily intended for cleaning and removing fatty and greasy soils, protein, and blood from food processing equipment in the meat, poultry, dairy, and beverage industries, and can be used for any cleaning job which is usually done with a conventional chlorinated alkaline foam cleaner.

PHYSICAL PROPERTIES

Appearance	:	Clear, pale yellow green liquid
Odor	:	Mild chlorine
pH (1%) Solutions	:	11.8
Density	:	9.38 lbs./gallon
Available Chlorine	:	3.3% (Minimum)
Shelf Life	:	1 Year

DIRECTIONS FOR USE

Equipment Cleaning:

Use 2 to 10 ounces of AFCO 6651 per gallon (15 to 78ml/L) of water depending on soil and type of surface. For best results, water temperature should be 15 to 46°C/60 to 115°F. Rinse with potable water before processing resumes.

Consult your *AFCO/Zep* technical representative for specific use applications.

SAFETY

Safe to use on stainless steel. Do NOT use on aluminum or other soft metals as it will corrode these!

DANGER

Corrosive! Contact with undiluted product causes severe skin burns and serious eye damage. Consult the product's Safety Data Sheet (SDS) for complete safety information.

NOTE

AFCO 6051 is U.S.D.A. acceptable for use in federally inspected meat, poultry and food processing plants.
