

CCT HS (AFCO 6057)

GENERAL DESCRIPTION

CCT HS (AFCO 6057) is a heavy-duty caustic gel (thin film) cleaner designed for use in hard water. Because of its unique formulation. This product is a clear, low viscosity liquid in its concentrated (undiluted) form, but when mixed with water at the recommended use concentration it becomes a viscous gel solution. This gel solution forms a thin film of cleaner on the surface of the equipment resulting in prolonged contact time on the soiled surface.

AFCO 6057 provides a long dwell time on all surfaces including vertical and complex shapes, providing a long contact time combined with easy rinsing and cost-effective results. It is especially effective on irregular or rough surfaces where standard foams struggle to achieve coverage. Using this product in place of conventional foam cleaners can result in more thorough and effective cleaning with a reduction in cleaning time and labor costs.

AFCO 6057 is primarily intended for cleaning and removing fatty and greasy soils from food processing equipment in the meat, poultry, dairy, and beverage industries. *AFCO 6057* can be used for any cleaning job which is usually done with a conventional caustic foam cleaner.

PHYSICAL PROPERTIES

Appearance	:	Clear, pale-yellow liquid
Odor	:	Low
pH (1% solution)	:	12.3
Density	:	10.16 lb/gallon

DIRECTIONS FOR USE

Equipment Cleaning:

Add 2 to 10 ounces of *AFCO 6057* per gallon (15 to 78 ml/L) of water depending on the amount of soil and type of surface. For best results, water temperature should be between 60 to 100°F (16 to 38°C).

Consult your *AFCO/Zep* Technical Representative for specific use applications.

Note: *In Canada, to remain compliant with Canadian VOC regulations, do not exceed a use rate of 15.25 oz/gal (119 mL/L).*

TECHNICAL DATA SHEET

800 Development Ave. • Chambersburg, PA 17201 • 1-800-345-1329 • www.afcocare.com

SAFETY

Safe to use on stainless steel. Do NOT use on aluminum or other soft metals, as it will corrode these.

DANGER

Corrosive. Contact with undiluted product causes severe skin burns and serious eye damage. May be harmful if swallowed. Consult the product's Safety Data Sheet (SDS) for complete safety information.

NOTE

AFCO 6057 is U.S.D.A. acceptable for use in federally inspected meat, poultry and food processing plants.
