## Enhancer #1 (AFCO 8200)

### GENERAL DESCRIPTION

Enhancer #1 (AFCO 8200) is a proprietary blend of chelating agents and surfactants which, when added to freshly prepared or reclaimed caustic solutions, will enhance or restore the cleaning performance of the caustic solution. The chelating agents in Enhancer 1 tie up water hardness ions and prevent the formation of film and scale on equipment. The surfactants in AFCO 8200 emulsify oils and greases and improve wetting and rinsing of the equipment surface.

AFCO 8200 may also be used as an additive in the detergent cycle of industrial laundry operations to minimize the effect of hard water and increase the performance of laundry detergents like Liquid Twirl (AFCO 5355).

### PHYSICAL PROPERTIES

Appearance	:	Clear, colorless liquid
Odor	:	Slight
pH (as is)	:	9.7
Density	:	10.76 lbs./gallon (1.29kg/L)
Foam Level	:	Very low

### DIRECTIONS FOR USE

Use 2 to 10 ounce(s) of AFCO 8200 for every 100 gallons of caustic cleaning solution depending on water hardness and soil level.

Note: Dosage in laundry operations is based on the specific water conditions of the facility.

Consult your *AFCO/Zep* technical representative for specific use applications.

### DANGER

Causes skin and eye irritation. In case of skin or eye contact flush immediately with water for 15 minutes. If irritation persists, get medical attention. Consult the product's Safety Data Sheet (SDS) for complete safety information.
